

Global Health signs up Peninsula Health, plans integrations with iPM and Cerner

Written by Kate McDonald on 07 July 2020.

ASX-listed healthcare software firm Global Health has signed a three-year contract with Peninsula Health for to roll out its MasterCare platform for community health, adding the first metropolitan health service to a growing number of regional health providers.

As part of the implementation of MasterCare, Global Health will integrate with DXC Technology's iPM patient administration system and some of Cerner's clinical applications. Peninsula Health includes the 454-bed Frankston Hospital and Rosebud Hospital and has used a Cerner EMR for a number of years.
